

Find your Wi-Fi network password in Windows

Applies to: Windows 10 Windows 8.1 Windows 7

If you forgot your Wi-Fi network password, you can find it if you have another Windows PC already connected to your Wi-Fi network. After you find your password, you can use it on another PC or device to connect to your Wi-Fi network.

1. On a Windows PC that's connected to your Wi-Fi network, do one of the following, depending on which version of Windows is running on your PC:
 - On Windows 10, select the **Start**  button, then type **Cont** and you will see the Control Panel at the top, click on it. Then go to **Network and Sharing Center**.
2. In Network and Sharing Center, next to **Connections**, select your Wi-Fi network name.
3. In Wi-Fi Status, select **Wireless Properties**.
4. In Wireless Network Properties, select the **Security** tab, then select the **Show characters** check box.
Your Wi-Fi network password is displayed in the Network security key box.
